Waterways are recreational waterways on a lake, river, or ocean specific to boating activities. Waterways emphasize local water resources and provide opportunities for boats, personal watercraft, and small sailboats. These are popular places for boating activities such as fishing, hunting, and water sports.

For your safety and enjoyment:
- Always wear a life jacket.
- Obtain proper instruction in boating skills.
- Know fishing and boating regulation.
- Be prepared for emergencies.
- Carry proper equipment.

RESPECT THE PRIVACY & RIGHTS OF LANDOWNERS
- Respect the privacy and rights of landowners along the Juniata River Water Trail. For information on obtaining permission before entering any privately owned land, unless you are certain that landowners welcome, acquire it privately through easement or purchase. Otherwise, be mindful that users are restricted from using land, and they should not enter any land without permission.

FISHING OPPORTUNITIES
- The Juniata River Watershed supports diverse coldwater and warmwater fisheries that include walleye, northern pike, smallmouth bass, striped bass, and lake trout. The river supports a variety of baitfish, which attract sportfish.
- Check the current fishing regulations and seasons before going fishing.

NEARBY AREAS
- The Raystown Branch is the largest tributary of the Juniata River stretching 110 miles through Bedford County. The river flows through the Juniata River National Scenic Byway and along the Allegheny Mountain Scenic Byway. The river also provides access to numerous state parks and other recreation areas.
- The Juniata River is home to several species of fish, including smallmouth bass, brown trout, and rainbow trout. The river also supports a variety of bird species, such as the great blue heron, osprey, and belted kingfisher.
- The Juniata River is home to several species of mammals, including white-tailed deer, black bear, and bobcat. The river also supports a variety of reptiles, such as the common snapping turtle and the eastern box turtle.
