

Table 1. Frequency of angler trips distributed among the various sections of the Delaware River separated by license guides who are required to maintain catch logs and volunteer anglers. Briefly, sections 1-9 encompass mainstem waters from the confluence of the East and West Branches to approximately 9.5 river miles (rm) upstream from Port Jervis, New York. Sections 10 and 11 encompass mainstem waters from approximately 9.5 rm upstream of Port Jervis, New York to the confluence of the Lehigh River in Easton, Pennsylvania. Sections 12 and 13 encompass mainstem waters from the confluence of the Lehigh River to Trenton, New Jersey approximately 6.2 rm downstream of Scudders Falls Wing Dam. Sections 14-17 represent the tidal estuarine portions of the Delaware River watershed.
